

University Database ER-Model

Drawing of ER model of university database application considering the constraints –

- A university has many departments.
- Each department has multiple instructors (one person is HOD). Here the HOD refers to the head of department.
- An instructor belongs to only one department.
- Each department offers multiple courses, each subject is taught by a single instructor.
- A student may enroll for many courses offered by different departments.

Figure 3.20

An ER diagram for a UNIVERSITY database schema.

Airline Database ER-Model

Figure 3.21

An ER diagram for an AIRLINE database schema.

Bank Database ER-Model

Draw an ER model of the Banking database application considering the following constraints

- A bank has many entities.
- Each customer has multiple accounts.
- Multiple customers belong to a single branch.
- Single customer can borrow multiple loans.
- A branch has multiple employees.

Figure 3.22

An ER diagram for a BANK database schema.

Movie Database ER-Model

Figure 3.25

An ER diagram for a MOVIES database schema.

Company Database ER-Model

Draw of ER model for company considering the following constraints –

- In a company, an employee works on many projects which are controlled by one department.
- One employee supervises many employees.
- An employee has one or more dependents.
- One employee manages one department.
