

CSS Priority Example

This paragraph is styled using internal CSS.

CSS Selectors Demonstration

Group Selector Example

This paragraph is styled using the group selector.

This paragraph uses a class selector.

This paragraph uses an ID selector.

This is a normal paragraph (only group + universal apply).

CSS Font and Text Properties

This paragraph demonstrates the font-style property (italic).

This paragraph demonstrates the font-weight property (bold).

This paragraph demonstrates text-decoration (underline).

~~*This paragraph combines multiple font and text properties.*~~

Block-level and Inline-level Styling

This is a DIV element. It is a block-level element, so it takes up the full width available and starts on a new line.

This is another DIV element. Notice it appears on a new line automatically.

This is a paragraph with a **SPAN element** inside it. The span only styles part of the text and does not start on a new line.

CSS List Properties Demonstration

1. list-style-type

Unordered List (square):

- HTML
- CSS
- JavaScript

Ordered List (upper-roman):

- I. Frontend
- II. Backend
- III. Database

2. list-style-position

Inside:

- This text wraps inside the bullet alignment.
- Notice how the text aligns.

Outside (default):

- This text wraps outside the bullet alignment.
- This is the default behavior.

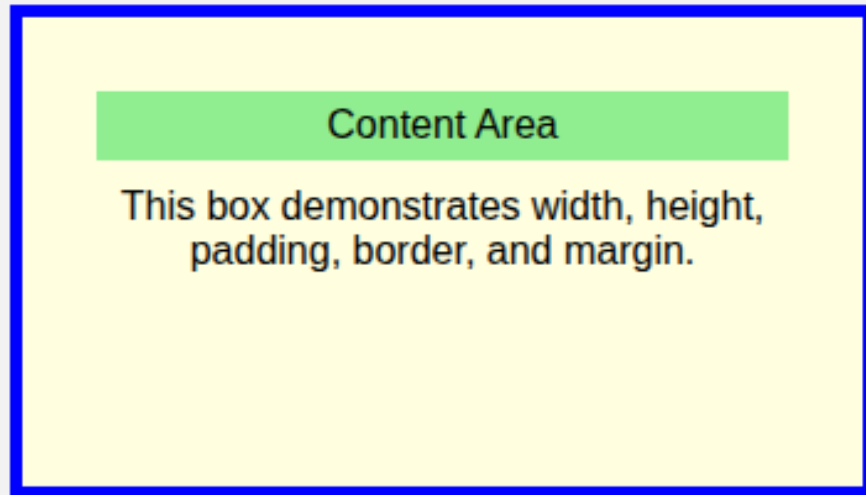

3. list-style-image

-  Custom Bullet 1
-  Custom Bullet 2
-  Custom Bullet 3

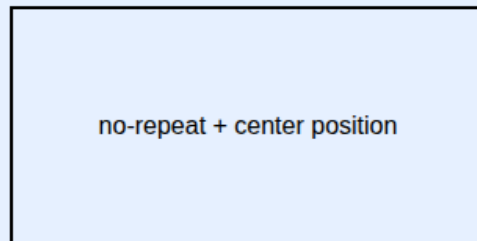

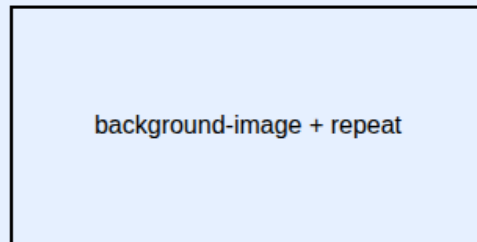

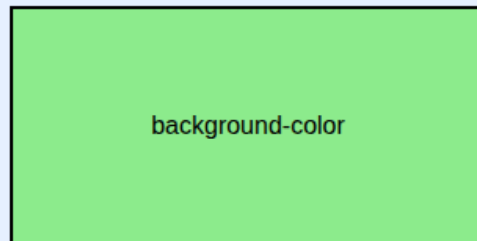

4. list-style (Shorthand)

- Circle + Inside
- Defined using shorthand
- Cleaner CSS

CSS Box Model Demonstration

Background Properties Demonstration

CSS Border Properties Demonstration

Border Style (dashed)

Border Width (8px)

Border Color (red)

Border Radius (rounded corners)
