

Fundamentals of Programming using C

Assignments

1. Write a C program to find the largest of three numbers.
2. Write a C program to find sum of digits and reverse of a number.
3. Write a C program to find the area and perimeter of a circle.
4. Write a C program to check whether the given number is palindrome.
5. Write a C program to find sum of n natural numbers.
6. Write a C program to find the arithmetic operations of two numbers using switch case.
7. Write a C program to convert decimal to binary and visa versa.
8. Write a C program to convert decimal to octal and visa versa.
9. Write a C program to convert decimal to hexa decimal and visa versa.
10. Write a C program to find roots of quadratic equation.
11. Write a C program to generate fibonacci series.
12. Write a c program to perform linear search to find a desired number.
13. Write a C program to find factorial of a number.
14. Write a C program to display student marks card using structure.
15. Write a C program to display employee salary report using structure.
16. Write a C program to search an element from the list of n elements.
17. Write a C program to accept and display the details of 10 books using structure.
18. Write a C program to accept and display the details of 10 Cars using structure.
19. Write a C program to find the sum and average of all elements in an array of size n using function.
20. Write a C program to find the sum and average of all elements in a matrix of order mxn using function.
21. Write a C program to perform addition of two matrices.
22. Write a C program to perform multiplication of two matrices.
23. Write a C program to find the difference of two matrices.
24. Write a C program to find transpose of a matrix.
25. Write a C program to create a string array.
